

# "XF" COVER SET ENGINE & CANOPY

# BLACK FRIDAY WEEK SPECIAL!

Closes CYBER MONDAY

The competition cannot match the finish of CLA "fitted" XF Covers. The carefully stitched material and smart bias binding enhances your parked SeaRey! XF Covers feature white embroidered "Searey" logos on the grey fabric material

- Sharp looking !

The light-weight, non-woven, water resistant, synthetic material facilitates the release of moisture and has a UV-blocker treatment.

These covers fold **small and light** for away trips. Used on normally-hangared aircraft, fabric life expectancy should be many **years**..

And while they are on your SeaRey, XF Canopy Covers protect your Lexan from dust, dirt, water and frost. They block UV that will damage Lexan and interiors. XF Engine Covers keep your engine free from dust and dirt. They also block UV that damages rubber engine components including carb boots, and fuel, oil and coolant hoses.

CLA XF covers are easily cleaned with mild detergent, lukewarm water, and left to air dry.

The soft black bias binding protecting cover edges also reinforces a bow-eye opening. Three adjustable quick-connect straps with protected fasteners positioned above the fabric lip, look after windy situations. Normally all you'll use are aft corner located dome post-fasteners.

The Engine Cover was designed to fit loose, allowing for various exhaust and oil

- Special Features !

- Functional Protection !

- Storm Secure !

- Stows Light & Compact !

- 30 Second Install !

cooler installations on Rotax 912 and 914 turbo engines. Where it would normally contact a CKT exhaust, it is reinforced with a synthetic fiber layer.

Soft, black bias binding finishes and protects all edges and the prop hub opening, (neatly closed with Velcro.) End hooks on a bungee draw-string, quickly secures the cover in place but there are also two forward tie-down grommets for windy locations.
