Searey Electrical Tray Support Kit

With the popularity of the Glass Cockpit, it has become apparent that while the instrument panel is less cluttered, more room is needed under the panel.

If you are building a Searey Classic or LSX, this Searey electrical tray mounts just above and forward of the rudder pedals, allowing plenty of room for the electronic modules. May be installed at any point during the build process prior to final attachment of the fiberglass nose deck.

\$178.99 + \$5.00 Packing Charge + Shipping

Searey Sponson Mirror Kit

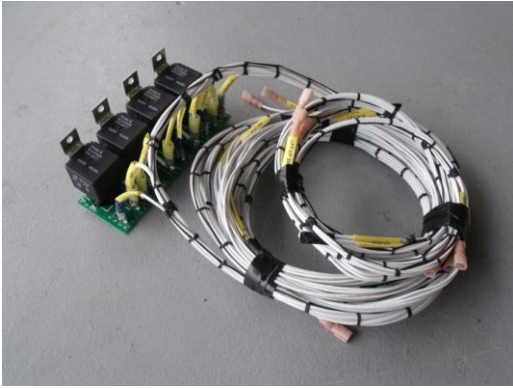

Tired of attaching your sponson mirror with silicone or safety wire and still not having the right viewing angle? Ever watch it suddenly fall off your airplane while flying, or get taken out by a wave?

Try our mirror kit, which bolts to the sponson and is adjustable in two axes. Kit includes two complete mirror and mounting kits. Installs in ten minutes for the pair!

Searey Electric Gear Wiring Kit

Note: Not for use with Internal Micro Switch Actuators

Wiring Harness for all Searey aircraft kits for conversion from 'A' or 'B' (Hydraulic) landing gear to the current style 'C' Electric Gear System. May be installed in all Searey Classic's or Searey LSX kits under construction.

- Wiring harness consists of 190 feet of Mil Spec Tefzel M22759 wire.
- All connectors (except for two which come with the linear actuators) are installed on the harness. No soldering.
- Relays are mounted and pre-wired.
- Wire harness is bound the old fashion way by wire lacing, not Tie-wraps or tape.
- All wires are labeled for easy identification.
- Extensive installation instructions included.

\$395.00 + Shipping

Sealed Micro Switches

Waterproof, Sealed Micro Switches replace the stock switches supplied with Searey Airframe Kits.

These switches have the same footprint and will mount into existing holes, and contain pig leads for easy installation.

\$15.00 per switch (or \$50.00 for four) + Shipping
